

TRAN QUOC MINH

FULLSTACK INTERN

Thu Duc | tranquocminh15981@gmail.com | 0961166405

CAREER OBJECTIVES

Short-term: Complete the university program in 2026.

Long-term: Become a software engineer within the next 3 years.

WORK EXPERIENCE

PERSONAL PROJECT: STATIONERY E-COMMERCE WEBSITE

Full-stack Developer | [Link Demo](#) | [Frontend Source](#) | [Backend Source](#)

Description: Developing an online stationery management and business system based on a separate Client-Server model, focusing on smooth user experience and data security.

- *Technologies Used:*
 - Frontend: React.js, Vite, SCSS, React Router.
 - Backend: Java Spring Boot, Spring Security.
 - Database: PostgreSQL (Supabase).
 - Cloud & DevOps: Vercel, Render, UptimeRobot.
- *Key Learnings from the Project:*
 - Implemented **authentication** and authorization using **JSON Web Token (JWT)**.
 - Used **Supabase** for database management and user **access control**.
 - Designed and developed standardized **RESTful APIs** with Spring Boot.
 - Used **UptimeRobot** to monitor and maintain system availability.

EDUCATION

Information Technology | Nong Lam University | 2021 - Now

SKILLS

Programming Languages: Java, JavaScript/TypeScript, ReactNative.

Computer Science Fundamentals: Data Structures and Algorithms, OOP, JWT.

Cloud & Hosting: Vercel (Frontend), Render (Backend/API), Supabase(Postgres).

Monitoring & Automation: UptimeRobot (System availability monitoring).
